## DETAILED ACTION

### Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-11 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of copending Application No. 09/928624 in view of Block et al. (US Patent 6299913) and Lundeen (Feedstuffs, vol. 73(47), pp. 8, 12 Nov 2001).

'624 claims the conjugated linoleic acid for dairy cows. The application does not claim the DCAD. Block et al. teach the DCAD to improve milk production, while the reference of Lundeen teaches that the conjugated fatty acids improved milk production. It would have been obvious to one of ordinary skill in the art to combine the conjugated linoleic acid of the claims in '624 with the DCAD of the reference based on the

teachings of Block et al and the reference that the two elements improve milk production. See In re Kerkhoven, 205 USPQ 1069.

This is a provisional obviousness-type double patenting rejection.
